# DETERFLOOR

## Gloss detergent for surfaces

### Description

DETERFLOOR is the result of careful research and created from a special highly concentrated formula for the cleaning and maintenance of various surfaces. Thanks to its special formula, as well as having a sanitising and glossing properties, it also prevents the formation of moulds, bacteria and pathogenic germs.

Available with a "Mint-Pine" perfume.

### Characteristics

DETERFLOOR has the ability to remove surface dirt on any types of flooring. Thanks to its delicate but powerful cleaning ability, it is also suitable for flooring of a more delicate nature such as stone, marble (also polished), wood, ceramic, laminated, linoleum, gres porcelain tiles etc...

- Is a detergent with low-level foaming.
- If used in the recommended measure, no rinsing required.
- Can have various levels of concentration.
- Leaves the environment with a sense of freshness and cleanliness.
- Suitable for washing/drying appliances.
- Because it is used in very small doses, it is very economical.
- Maintains the glossiness of the wax components.
- Does not leave any residue.

### Composition

Anionic and non ionic surface active agents, glossing agents, perfume, anti-bacterial agents, glycols, water.

### Application

Shake well before use. For normal cleaning dilute 1-2% (with a glass) in a bucket of water of about 8/10 lt, pass with a mop (soaked in the solution and then squeezed) on the floor until the desired effect is obtained. No rinsing is required. For more obstinate dirt, use a higher concentration, it will then be necessary to rinse.

Before beginning, carry out some tests.

### Dilution

1-2% in water for frequent and normal washing, with no need for rinsing. 5-10% in water for aged dirt that is difficult to remove. In this case rinsing is required.

### Consumption by coat

With 10 lt. (diluted 3-5%) you can wash about 100 mq of surface.

### Packaging and storage

Bottles of 1 and cans of 5 lt.

The product remains unaltered for at least 24 months providing it is stored in the original containers, well sealed, in a cool place protected from freezing and UV light.

### Health and safety regulations

The product is not classified as dangerous according to the 67/548/CEE and 1999/45/CE regulations. But in any case it should be kept out of the reach of children and must not be disposed of in the normal drainage system in order to protect the environment.

No danger symbols are required on the packaging or containers but we advise the adoption of good and careful working practices.

For further information consult the health and safety data sheet.

The advice and indications given above are based on our experience and are of an informative nature and do not bind us to any responsibility. The application of the product takes place without our direct control, the user therefore takes all responsibility for any consequence of use. Our technical assistance team is available for any further information that might be necessary.
